

ScoutSweep Canisters

Now available for purchase

ScoutSweep...Sweepin' the area. Keepin' it clean!

One of the key words in the Scout Law is to keep clean. This is to be applied to the mind and body as well as the home and community for which Scouts reside. The main forms of pollution revolve around air, water, and land. Littering is one of the most problematic forms of polluting. 18% of all litter dropped to the ground is washed into waterways by storm water runoff. Litter is an environmental priority because it:

- Reduces the aesthetic appeal of public places (streets, parks, waterways)
- Can cause blockages of the drainage system and flooding
- Can be dangerous to people
- May be a fire hazard
- Costs the community a substantial amount of money to clean up
- Can decrease oxygen levels when it decays in water

Keep our streets clean with these **ScoutSweep** canisters. They come with 20 garbage bags, great for the car and can be refilled easily. Recognize your Scouts that have received the **ScoutSweep** patch with a canister!

Name _____

Address _____
